TECH USED

These are not randomly picked terms but the tech I've actually implemented in production projects.

ABOUT

Prefers building things from scratch - so that it is optimised for performance and we have superior control over it.

- Worked at product-based startups like [CredR](#), [Turtlemint](#)
- Developed an Android app (pet project) that got over 11K downloads on the Play Store
- Strives to implement principles of programming such as: DRY, OOP, Single-responsibility principle, and so on.
- Constantly learns directly from documentations (MDN, Python documentation, Django documentation, etc); instead of trial and error.
- Practices DSA on HackerRank
- Reads tech books multiple times for deeper understanding (such as JS: The Good Parts)
- Influenced by tech blogs like [Airbnb Engineering](#), [Hotstar Tech](#)
